Professional Summary

I'm a highly skilled Software Engineer driven by a passion for solving real-world problems through technology. I thrive on turning ideas into secure, scalable software solutions that make a tangible difference. Whether I'm architecting robust backend systems, crafting seamless APIs, or building intelligent machine learning models, my focus is always on creating tools that deliver value and impact. Beyond the code, I value collaboration, continuous learning, and the challenge of tackling complex problems in innovative ways. For me, every project is an opportunity to blend creativity, precision, and purpose.

Professional Experience

Network and Systems Support Assistant, Constech Limited

04/2025 – Present
Eldoret, Kenya

- Provide technical support for network infrastructure, including installation, configuration, and maintenance of LAN/WAN systems
- Assist in deployment and maintenance of CCTV surveillance systems and related security solutions
- Troubleshoot hardware, software, and network issues to ensure minimal downtime and efficient operations
- Support system configuration, updates, and routine maintenance across organizational IT systems
- Collaborate with technical teams on on-site and remote projects, ensuring timely completion of tasks
- Monitor system performance and report issues, contributing to improved reliability and efficiency
- Maintain accurate documentation of installations, configurations, and support activities
- Deliver user support and guidance to clients and staff on system usage and basic troubleshooting

Software Engineering Intern, Neer Technologies LTD

09/2024 – 02/2025
Nairobi, Kenya

- Assisted in the development and maintenance of web applications using modern frameworks and tools.
- Collaborated with developers to implement features, fix bugs, and improve system performance.
- Wrote clean, efficient, and well-documented code following industry best practices.
- Participated in debugging and troubleshooting software issues across the application stack.
- Supported database design, integration, and management tasks.
- Took part in code reviews, team meetings, and agile development processes.
- Gained hands-on experience with the software development lifecycle (SDLC).

Languages

English

Fluent

Kiswahili

Fluent

Skills

- **Programming Languages:** Python, SQL,
- **Frameworks & Libraries:** Django, FastAPI, jQuery
- **Databases:** PostgreSQL, MySQL
- **Tools & Platforms:** Git, GitHub, Postman, Docker
- Comfortable working in distributed, remote-first teams
- Strong written communication and technical documentation skills
- Fast learner with a proactive approach to new languages and tooling
- Strong belief in open source, knowledge sharing, and community collaboration

Education

Software Engineering, ALX Africa

01/2023 – 04/2024

- Gained a strong foundations in Software Engineering, then specialised in backend development.
- Learnt to build, test, and deploy secure, high performance software while applying industry best practices through collaborative, real world projects.

Hobbies and Intrests

- Reading tech blogs and industry publications
- Listening to music
- Cycling and hiking
